Skills

Skills: Software Architecture, Microsoft Azure, AWS, GCP, Artificial Intelligence, Agentic System, MCP, RAG, Microsoft Power Apps, Enterprise Software Development

Experience

Impact Assessment Agency of Canada / Senior A.I. Developer

Aug. 2024 – Present, Edmonton, Alberta (Remote)

The Impact Assessment Agency of Canada assesses major projects to identify and mitigate environmental, economic, and social effects, ensuring sustainable development.

- Collect and document clients' requirements and develop digital and infrastructure specifications for our A.I. enabled systems.
- Design and coordinate the development, installation, integration and operation of our experimental A.I. systems, resulting in a 40% quicker service process.
- Upgrade and develop Indigenous Consultation digital solutions for our Assessment Management System (AMS), decreasing consultation logging time speed by 50%.

Tech: Microsoft AI Foundry, Agentic System, RAG, MCP, Power Apps

Brass Lion Entertainment / Online Programmer

Jul. 2023 – Apr. 2025, Edmonton, Alberta (Remote)

Brass Lion Entertainment is a game development studio dedicated to creating original fictional universes, characters, stories, and themes.

- Developed an item migration tool, optimizing item management by 96%.
- Created a server log download tool, reducing QA bug reporting time by 95%.
- Implemented a matchmaking system and data timer for server-side requests.
- Supported the Character Creation group with essential online features.
- Delivered various live-ops features to enhance game operations.

Tech: C++, C#, Azure, Server/Client Architecture, .NET Framework

Rec Room / Tools Engineer Intern

Jan. 2023 – Apr. 2023, Thunder Bay, Ontario (Remote)

Rec Room is a virtual reality multiplayer game that enables users to create and share games and experiences collaboratively.

- Built an in-house build download tool that reduced build download time by 70%.
- Provided UI development and tooling support.

Tech: C#, Azure, Jenkins, MAUI, Full-Stack Development, .NET Framework

PointClickCare / MLOps Engineer Intern

Jan. 2022 – Apr. 2022, Thunder Bay, Ontario (Remote)

PointClickCare is a leading cloud-based healthcare technology provider for long-term and post-acute care facilities.

- Supported MLOps data pipeline features and infrastructure.
- Created comprehensive test cases for data pipeline validation.
- Monitored and responded to security vulnerabilities.
Tech: Python, Java, AWS, Azure, Jenkins, Terraform, NLP, Machine Learning, Microsoft SQL Server

Hubei Xinyegang Co., Ltd. / Software Engineer
Jul. 2012 – Feb. 2020, Huangshi, China (On-site)
 Hubei Xinyegang is a historic specialty steel producerl.

- Designed, engineered, and maintained enterprise-level internal finance and accounting software systems by applying software engineering principles, architectural standards.
- Analyzed business and system requirements and led the design of technical solutions, preparing detailed functional and technical specifications for full-stack applications developed using C#, Oracle databases, and internal frameworks.
Tech: C#, .NET Framework, Oracle, SQL, Internal Enterprise Frameworks

Projects

NeighborIQ / *Python, Vue3, FastAPI, Docker, GIS, ML/AI*

- **AI Insight Engine:** Provides a dedicated service layer for neighborhood-specific intelligence, integrating with OpenAI, Gemini, and local providers.
- **Geospatial Extensibility:** Built for community-driven data analysis, combining GIS capabilities with LLM reasoning to generate actionable local insights.
- **Modular Architecture:** Features a containerized design with a shared core library and automated migration system for seamless development and scaling.

Aegis / *Python, TypeScript, FastAPI, Docker, Prometheus, Grafana*

- **Multi-Tier Routing:** Automated fallback logic across Anthropic, Azure OpenAI, vLLM, and Ollama with built-in circuit breakers.
- **Data Governance:** Enforces PIPEDA residency and utilizes a PIIMasker (Presidio) to ensure sensitive data (SIN, credit cards) never reaches cloud providers.
- **Financial Controls:** Manages per-team budget caps and provides real-time cost tracking via a centralized control plane.

Education

Lakehead University / Master's Degree in Computer Science

GPA: 3.86/4.0; First Class Honours

Relevant Coursework: Machine Learning, Deep Learning, Pattern Recognition, Big Data, Natural Language Processing.

Dalian Minzu University / Bachelor of Engineering in Software Engineering
